LETTER TO THE EDITOR

SHCHERBAK, V. I., Sixty-four Triplets and 20 Canonical Amino Acids of the Genetic Code: The Arithmetical Regularities. Part II. 475

ERRATUM 479

Index to Volume 166

Acclimation, photosynthetic, as a special case of reaction norms; a model, 1
Age-structured populations of homosexual men, threshold conditions for the spread of HIV infection in, 9
AHARONI, Y., BROSH, A. and HOLZER, Z., Double-marker digestive tract model, 407
AIRLIE, M. A. A. (see KIRBY, T. P.), 135
Amino acids, canonical, of the genetic code; the arithmetical regularities (letter), 475
Animal duets: forcing a mate to be attentive, 221
Ants, harvester, *Pogonomyrmex*, spatial model of movement and foraging in, 299, 315
Asex, koinophilia stabilizes bi-gender sexual reproduction against, in an unchanging environment, 251

Backbone, RNA, stress localization in, 443
BARDAKJIAN, B. L. and DIAMANT, N. E., A mapped clock oscillator model for transmembrane electrical rhythmic activity in excitable cells, 225
BARRAI, I., SCAPOLI, C., NESTI, C., POLI, G., GAMBARI, R. and BERRETA, M., Codon usage and evolutionary rates of proteins, 331
Behavioural analysis, the discrete Fourier transform in, 419
BERETTA, M. (see BARRAI, I.), 331
Bifurcation, chaos and suppression of chaos in FitzHugh–Nagumo nerve conduction model equation, 275
Biological sequences, fast identification of repetitive elements in, 51
Biology, developmental, on topological simulations in, 33
Biomembranes, effects of conformational elasticity and ion-channel interaction on thermodynamic equilibrium of, 375
BRADBURY, R. H. (see SEYMOUR, R. M.), 453
BRASS, A., GRENCIS, R. K. and ELSE, K. J., A cellular automata model for helper T cell subset polarization in chronic and acute infection, 189
Breeding, competitive, delayed, in roving males, 127
BROSH, A. (see AHARONI, Y.), 407
Brownian motion of the end-to-end distance in oligopeptide molecules, 173

Ca^{2+} oscillations, $InsP_3$ receptor-mediated; equations derived from a detailed kinetic model, 461
Ca^{2+} oscillations, IP_3-induced; simplification of a realistic model, 431
CARSON, E. R. (see KIRBY, T. P.), 135
Catastrophe, ecological, intrinsic uncertainty in, 91
Cells, excitable, a mapped clock oscillator model for transmembrane electrical rhythmic activity in, 225
Cerebral cortex, intrinsic geometry of, 261
Chaos in Fitzhugh–Nagumo nerve conductions model equation, 275
Chaos, intermittent, in population dynamics, 325
CHELA-FLORES, J., Are viroids molecular fossils of the RNA world?, 163
CHEN, P.-L. and SACHS, R., Singular perturbation theory applied to Markov models for DNA damage caused by ionizing radiation, 117
CHERNYAK, Y. B., Effects of conformational elasticity and ion-channel interaction on thermodynamic equilibrium of biomembranes, 375
"Circadian paradigm": a test of involvement of the circadian system in the photoperiod clock, 101
Codon usage and evolutionary rates of proteins, 331
Communication in spatial model of movement and foraging in harvester ants, 299
Competitive breeding, delayed, in roving males, 127
Conformational stability of folded proteins, 63
CRIST, T. O. and HAEFNER, J. W., Spatial model of movement and foraging in harvester ants (*Pogonomyrmex*) (II): The roles of environments and seed dispersion, 315
CRIST, T. O. (see HAEFNER, J. W.), 299

Daisyworld parable; evolution without natural selection, 365
DE CORT, S. C. (see KIRBY, T. P.), 135
Developmental biology, on topological simulations in, 33
DE YOUNG, G. (see KEIZER, J.), 431
DIAMANT, N. E. (see BARDAKJIAN, B. L.), 225
Diffusion model for neural activity, synaptic transmission in, 393
Digestive tract double-marker model, 407

Discrete Fourier transform in behavioural analysis, 419
Dispersions of seeds in spatial model of movement and foraging in harvester ants, 315
DNA damage caused by ionizing radiation; Markov models, 117
DOEBELI, M., Intermittent chaos in population dynamics, 325
Double-marker digestive tract model, 407
Duets, animal; forcing a mate to be attentive, 221
DUMORTIER, B., The "Circadian Paradigm": A test of involvement of the circadian system in the photoperiod clock, 101
DUVDEVANI-BAR, S. and SEGEL, L., On topological simulations in developmental biology, 33
Dynamic ventilatory response to hypoxia in normal subjects; model, 135

Ecological catastrophe, intrinsic uncertainty in, 91
Elasticity, conformational, effect on thermodynamic equilibrium of biomembranes, 375
Electrical rhythmic activity, transmembrane, in excitable cells; mapped clock oscillator model, 225
ELSE, K. J. (see BRASS, A.), 189
End-to-end distance, Brownian motion of, in oligopeptide molecules, 173
Environment in spatial model of movement and foraging in harvester ants, 315
Eusociality, origin of inequalities in the evolution of (letter), 113
Evolution of eusociality, origin of inequalities in (letter), 113
Evolution of metabolic pathways toward simplicity through the game of the pentose phosphate cycle, 201
Evolution without natural selection; further implications of the daisyworld parable, 365
Evolutionary rates of proteins, and codon usage, 331

FERNÁNDEZ, A., Stress localization in RNA backbone: a mechanical footprint for predicting base-backbone tertiary contacts, 443
FICHANT, G. A. (see QUENTIN, Y.), 51
FitzHugh–Nagumo nerve conduction model equation, bifurcation, chaos and suppression of chaos in, 275
FLENLEY, D. C. (see KIRBY, T. P.), 135
Folded proteins, conformational stability of, 63
Footprint for predicting base-backbone tertiary contacts, 443
Foraging in harvester ants (*Pogonomyrmex*), spatial model of, 299, 315
FORREST, T. G. and SUTER, R. B., The discrete Fourier transforms (DFT) in behavioural analysis, 419

GAMBARI, R. (see BARRAI, I.), 331
Genetic code: sixty-four triplets and 20 canonical amino acids; arithmetic regularities (letter), 475
Geometry, intrinsic, of the cerebral cortex, 261
Great Barrier Reef, spatial waves or synchronicity of outbreaks of crown-of-thorns starfish on?, 453
GRENCIS, R. K. (see BRASS, A.), 189
GRIFFIN, L. D., The intrinsic geometry of the cerebral cortex, 261
GROMIHA, M. M. (see PONNUSWAMY, P. K.), 63
Growth, accretive, radiate, a formal description of, 149

HAEFNER, J. W. and CRIST, T. O., Spatial model of movement and foraging in harvester ants (*Pogonomyrmex*) (I): The roles of memory and communication, 299
HAEFNER, J. W. (see CRIST, T. O.), 315
Herbs, optimal leaf phenology and photosynthetic capacity of, 237
Heterozygous advantage: is it necessary for polymorphism in one-locus two-allele systems?, 245
High-dimensional simulation of simple immunological models, 289
HILL, J. E. (see KIRBY, T. P.), 135
HIV infection in age-structured populations of homosexual men, threshold conditions for the spread of, 9
HOLZER, Z. (see AHARONI, Y.), 407
Homosexual men, threshold conditions for the spread of HIV infection in age-structured populations of, 9
HYMAN, J. M., LI, J. and STANLEY, E. A., Threshold conditions for the spread of the HIV infection in age-structured populations of homosexual men, 9
Hypoxia, modelling the dynamic ventilatory response to, in normal subjects, 135

Immunological models, high-dimensional simulation of, 289
$InsP_3$ receptor-mediated $[Ca^{2+}]_i$ oscillations derived from a detailed kinetic model, 461
Ion-channel interaction, effect on thermodynamic equilibrium of biomembranes, 375
Ionizing radiation, DNA damage caused by; Markov models, 117
IP_3-induced Ca^{2+} oscillations, simplification of a realistic model of, 431

JIANG, X.-H. (see ZHANG, D.-Y.), 245
